March 16, 1976

Mr. Richard Lester, Plant Engineer
General Electric Company
Redmond Circle
Rome, Georgia 30161

Dear Mr. Lester:

Enclosed please find the analytical results reported by the U.S. E.P.A. Region IV Surveillance and Analysis Division at Athens, Georgia taken during the recent PCB survey at the Rome, Georgia facility.

A second enclosure represents the responses to the questionnaire by those individuals involved. If you take issue with any of the responses note the correction and notify me. All corrections will be sent to Headquarters in Washington, D. C. for inclusion in the comprehensive report on PCB's.

You will be receiving during the week of March 15, 1976, specific recommendations which will assist you in reducing current PCB contamination at the facility.

Sincerely yours,

Ralph W. Jennings
Chemist
Water Enforcement Branch
Enforcement Division
